Welcome to our practice. We are looking forward to meeting you and caring for your oral health. Our objectives are high quality and preventive dentistry.

We consider it a major part of our relationship to help our patients understand and plan for their oral health needs in the years ahead. We want our patient to be happy and confident in their smile and to keep their teeth for a lifetime.

We strive to be perceptive and sensitive to the feelings of our patients at all times as well as empathetic to their comfort. Above all, we strive to give the best quality dental care in every possible respect, constantly updating our knowledge and technology.

Before any treatment is undertaken, we consult with our patients so there is a full understanding of the need, the procedures by which treatment will be rendered, and of the possible penalties to oral and overall health if the necessary dentistry is not completed.

Please visit our website at [www.meltondental.com](http://www.meltondental.com).

We look forward to seeing you in our office.

Sincerely,

Sean F. Melton, D.D.S., F.A.G.D.
